Rule Changes

Members are reminded that the deadline for submission of changes to the **Sports Rules (previously Technical Rules & Special Regulations) is 1 December 2025**. Following that date proposals cannot be submitted for the 2026/27 season and, in some circumstances, for the 2030 Olympic Cycle.

Concerning the **Competition and Event Regulations**, these will be impacted – principally from season 2027/8 onwards, but in certain cases from season 2026/7 – by ongoing proposals to improve and rethink the ISU's event delivery model. The first part of this change was shared with Members as part of the Event Bidding Process.

As part of the ongoing consultation around these proposals, there will be webinars organized in December to present and obtain Members feedback.

The Council has therefore decided not to publish proposals for changes to the Competition and Event Regulations until early 2026, in order to take into account Members' feedback and allow additional consultation space.

Once published, Members will still have 30 days to make specific comments on the proposed changes before any formal decision is taken.
