Figure Skating: Technical Artistry

Artistic – Athletic – Precise

Artistic. Athletic. Precise. This is Figure Skating. Or to put into just one word: Amazing! Figure Skating is breathtaking and beautiful. It has all you can wish for and combines athletic abilities with art as no other sport does. Athletes perform huge jumps, whirling spins, incredible lifts and intricate footwork, all woven into beautiful programs. Watch the Skaters doing up to four rotations in the air and landing safely on a thin blade, watch them spinning until you get dizzy, watch their acrobatic lifts and be in awe, discover the stories they tell on the ice in sync with the music and with their unique choreography, dressed in wonderful costumes. There are four disciplines: Women's and Men's Single Skating, Pair Skating and Ice Dance. Single and Pair Skaters compete in a Short Program and a Free Skating while the Ice Dancers have a Rhythm Dance with a yearly changing theme and a Free Dance. The Skaters collect points for their elements such as jumps, spins, lifts and for their presentation including choreography and skating skills. The judges evaluate the quality of the elements and the presentation. The highest score wins and anything can happen in the Short Program and in the Free Skating. The season starts in August with the ISU Junior Grand Prix and ends in March with the ISU World Championships.

Rules and Regulations

General Rules

ISU Championships are held in accordance with the International Skating Union (ISU) [Special Regulations and Technical Rules](#) The ISU Judging System used at the Figure Skating events is the one adopted by the 2004 ISU Congress. It is constructed as follows:

Competition Officials

Technical Panel

The Technical Panel is composed of the Technical Controller and two Technical Specialists, each one from different ISU Members (countries). A Data Operator assists them for recording purposes. An instantaneous slow-motion video replay system operated by a Replay Operator supports the Technical Panel in the identification of the performed elements.

The Technical Specialists identify and call the performed elements and the specific Levels of Difficulty of certain performed elements (e.g. spins, footwork). They identify illegal or additional elements and falls.

The Technical Controller authorizes and/or corrects all calls, supervises the Data Operator and can propose corrections, if necessary.

In case of disagreement, the majority among the three Officials prevails.

Judges

Under the ISU Judging System the Judges focus entirely on evaluating the quality of each element performed (Technical Score) and the quality of the performance (Presentation Score)

Their scores will be based on specific quality criteria for each element and will provide a comprehensive assessment of each skater's skills and performance, without comparing each skater in relation to all others. The Judge enters the scores through a touch screen unit. At ISU Events, Judges may review in real time certain elements of the skaters' performances by means of an instantaneous Video Replay System.

There will be a panel of a maximum of 9 Judges per segment. The scores of these Judges will form the result. Out of these scores, the highest and lowest score of each element or program component are ignored and the average will be taken from the remainder, generating the trimmed mean (average score).

Technical Score

Each element performed has a base value and the judges assign a "Grade of Execution" to the element allowing the element to increase in value when done well or decrease in value when done poorly. Each plus or minus step in the GOE results in increasing or decreasing the value by 10 % in Single and Pair Skating and by 16 % in Ice Dance.

A group of experts, including experienced skaters and coaches, have worked out a summary list of each element's Base Value as well as its "Level of Difficulty" in case of

spins, steps, lifts, etc. The level of points of the Base Value depends on the difficulty of the element.

Some elements such as spins and footwork sequences are further broken down depending on their “Level of Difficulty”.

These element Base Values and Levels of Difficulty ensure that skaters receive the appropriate and consistent credit for every element performed. The Base Value of all recognized elements are reviewed by the respective Technical Committees and published annually by the ISU in a Communication.

The name of the identified element will be listed instantaneously on the Judge’s screen. The Judge then simply grades the quality of the element on a scale of +5, +4, +3, +2, +1, 0, -1, -2, -3, -4, -5. With this scale and the resulting “quality judgment”, the Judge can either increase or decrease the Base Value of each performed element.

The total of all the elements scores gives the Technical Score.

Presentation Score

In addition to the Technical Score, the Judges will award points on a scale from 0.25 to 10.00 with increments of 0.25 for the Presentation Score to grade the overall presentation of the performance with three (3) Program Components: Composition, Presentation, Skating Skills. For Pair Skating and Ice Dance there must be equal demonstration of the criteria by both skaters.

The Components definitions and criteria have been reduced from five to three in 2022 and have been updated in order to avoid possible overlapping and make the criteria more understandable and clear. Please refer to the [Program Components FAQ](#) for further information.

- **Composition** refers to how the program is designed in relation to the music and contains connection between and within the elements, pattern/ice coverage, multidimensional movement and use of space, choreography reflecting musical phrase and form.

- **Presentation** evaluates how the program is performed and includes expressiveness and projection, variety and contrast of energy and movements, musical sensitivity and timing; oneness and awareness of space (for Pair Skating, Ice Dance and Synchronized Skating).
- **Skating Skills** is defined by variety and clarity of edges, steps, movements, turns and directions, body control, balance and glide, flow, power and speed; unison (for Pair Skating and Ice Dance).

Final Score

The Total Segment Score for each participant in each Segment of a competition (Short Program/Rhythm Dance, Free Skating/Free Dance or Pattern Dance(s)) is calculated by adding the Total Elements Score and the Program Component Scores, subtracting any deductions (for example -1.0 for a fall).

In Ice Dance, for events with two Pattern Dances, the Total Score for each dance will be multiplied by a factor of 0.5.

The Total Segment Score of both programs are added and the result constitutes the Final Score in a competition. The participant with the highest total score wins.

Availability of Data and Statistics

At the end of each segment, a list will be published which includes all relevant scoring data for skaters.

Under the ISU Judging System there is far more data available to analyze than before. This data can help the National Federations, athletes and coaches to improve future performances.

The media, skating fans and general public can find statistics and detailed data on the ISU [Home of Skating](https://www.isu.org/en/home-of-skating) website.

Officials Accountability

The Skaters' performances are video recorded and can be reviewed on screen at any time.

A computer checks and identifies possible anomalies which are further checked by an appointed Officials Assessment Commission. These anomalies can either be supported or refuted by the Commission as possibilities for a variance in the scoring. Refuted possibilities or repeated errors by a single official could result in a sanction.

ISU Figure Skating Championships

There are four ISU Figure Skating Championships held annually: the ISU World, ISU European and ISU Four Continents Figure Skating Championships as well as the ISU World Junior Figure Skating Championships. In order to be eligible to compete in a ISU Championship, Skaters need to have obtained a Combined Total Elements Score that is announced at the beginning of each season (see above).

ISU Grand Prix of Figure Skating

The Skaters are seeded and invited to the six Grand Prix of Figure Skating events based on the results of the precedent ISU World Figure Skating Championships. Skaters/couples who have placed 1 to 6 in each of the four categories are seeded and assigned to two events. Skaters/ couples who have placed 7-12 at the ISU World Figure Skating Championships are selected for two ISU Grand Prix of Figure Skating events, and skaters with a top 24 Seasonal Best Scores (from the precedent

season) as well as those placed in the top 24 of the World Standings can also be invited. If available medalists from the ISU World Junior Figure Skating Championships and the ISU Junior Grand Prix of Figure Skating Final gold medalists can also be selected.

In order for a skater/couple to be eligible to compete at an ISU Grand Prix event, a minimum total score must have been achieved in the previous season in an ISU event (Grand Prix, Junior Grand Prix, Championships) or a Challenger Series event. Exceptions

apply to host country skaters, previously ranked skaters or split ranked couples who return with new partners.

For the 2025/26 season, the minimum total score is 3/5 of highest score per discipline at the ISU World Figure Skating Championships 2025 and are as follows:

Women: 133.78

Men: 191.14

Pairs: 131.87

Ice Dance: 133.24.

Junior Skaters compete in the ISU Junior Grand Prix of Figure Skating Series that consists of seven events and the ISU Junior Grand Prix Final. All ISU members can send Skaters with the number of spots depending on the precedent ISU World Junior Championships. No minimum score is required to participate.

Results of each ISU Grand Prix/ISU Junior Grand Prix event are available [here](#).

ISU Challenger Series

The ISU Challenger Series was introduced in 2014. It consists of a series of international Figure Skating competitions organized by ISU Members. The ISU provides support to ensure the proper and consistent organization and conduct of up to ten International Competitions linked together within the Challenger Series. Skaters can earn World Standing Points in these events. No minimum score is required to compete in a ISU Challenger Series competition.

History of jumps in Figure Skating

There are six different jumps in Figure Skating that are performed in competition.

Jumps

Axel

The Axel is named after Norwegian Figure Skater Axel Paulsen. As it has a forward takeoff but lands backwards, an Axel actually has half an extra rotation (i.e. a single Axel is 1.5 revolutions, a double is 2.5 revolutions, a triple is 3.5 revolutions). The first single Axel ever to be performed was by Paulsen in 1882 in Vienna (outside of competition). Sonja Henie (NOR) became the first female Skater to perform an Axel in competition in the early

1920s. Richard Button (USA) completed the first double Axel at the 1948 Olympic Winter Games.

Flip

The flip is a toe jump that takes off from a back inside edge and lands on the back outside edge of the opposite foot. The origins of the jump are not well documented and the inventor is not known for certain, however it is possible that Bruce Mapes (USA) created the jump.

Loop (Rittberger)

The loop is a jump that takes off from a back outside edge and lands on the same backwards outside edge. It is believed that the jump was created by Werner Rittberger (GER), in fact in German and Russian, the jump is known as “Rittberger”.

Lutz

The Lutz is a toe-pick assisted jump with an entrance from a back outside edge and landing on the back outside edge of the opposite foot. The jump is named after Austrian Figure Skater Alois Lutz, who performed it in 1913.

Salchow

The Salchow is an edge jump with a takeoff from a back inside edge of one foot and its landing is made on the back outside edge of the foot opposite. The jump was invented and named after Ulrich Salchow (SWE) in 1909.

Toeloop

The toeloop is a toe jump that takes off and lands on the same backward outside edge. It was invented in the 1920s by Bruce Mapes (USA).
